

RFS&I ICE FISHING SEASON 2023-24 SURVEY

Ice Fishing Members,

The RFS&I Board of Directors are conducting a survey for this season's ice fishing. Information collected from the survey will help us with an ice fishing management plan for Apache and Ramona. We will also use creel counts collected by our patrol staff to determine how best to manage the stocking of Apache and Ramona for ice fishing and the regular season.

We would appreciate RFS&I ice fishing members input for the 2023-24 season by filling out the following survey:

	<u>APACHE</u>	<u>RAMONA</u>
Number of days fished?		
Number of days trout were caught?		
Number of days perch were caught?		
How many years have you ice fished Apache and/or Ramona?		
Rate your ice fishing ability: Novice Moderate Experienced		
What species of trout were caught, circle all that apply even if only one fish of a specie was caught: Brown Cutbow Palomino Rainbow Walleye		
Feel free to add comments:		

Surveys can be mailed to the office after the season, given to the patrol staff, mailed with your 2024 dues, or dropped off at the office in the drop box.

Thank you, RFS&I Board of Directors.
